

Mesh Heterogeneous Internet Gateway Radio

Mesh Heterogeneous internet gateway radio integrates broadband Mesh AD hoc network, 3G/4G/5G router, 4G LTE and WiFi AP to realize interconnection between broadband AD hoc network, 4G public network and LTE private network, heterogeneous networking between space and earth.

Handheld/Vehicle/Standard Rack Mesh Heterogeneous Internet Gateway Radio
(Mesh+4G/5G Router+Fiber MODEM)

Schematic

Features:

- MimoMesh/SmartMesh 2W×2/10W×2 vehicle radio, 3G/4G/5G, 4G LTE, 2.4G/5.8G WiFi AP, Optical port ×2
- Flexible networking, rapid deployment. Built-in lithium battery, the use time is more than 6 hours
- One-button boot, no need to configure and change parameters, convenient operation and maintenance, waterproof, dustproof and shockproof, IP66
- With a display screen, you can view the device status, link status, and straight-line distance with the adjacent base station or terminal. Quick configuration is supported by buttons on the screen
